Burgkirchen, 17.12.2001

Dyneon™ TF4103 Glasscompound Food Contact and FDA Status

It is hereby certified that the basic monomers used for the production of the above-mentioned product supplied by Dyneon™ are listed in the EU-Directives 90/128/EEC, 92/39/EEC, 93/9/EEC, 95/3/EC, 96/11/EC, 1999/91/EC about materials and articles made of plastics and intended to come into contact with foodstuffs or toys and in the „German Bedarfsgegenständeverordnung“ of April 10th, 1992 as hereafter including December 21st, 2000.

Restriction exist for

TFE SML = 0,05 mg/kg

The above mentioned restrictions and the global migration have to be checked on the finished article by the manufacturer or seller.

The basic monomers of the above-mentioned product comply in respect of species, quantity and purity with the German Recommendation LI "Temperaturbeständige Beschichtungssysteme... (160. Mitteilung)" as issued by the German „Bundesinstitut für gesundheitlichen Verbraucherschutz und Veterinärmedizin“ (BfV).

Furthermore the basic monomers of the above-mentioned product comply with 21 CFR 177.1550 and may be used as articles or components of articles intended to contact food. It is the customer's responsibility to test finished articles to ensure compliance with the extractives limitations of applicable regulations (see FDA regulations for any limitations or conditions of use).

There are no objections against the use of the above mentioned basic monomers for articles intended to come into contact with foodstuffs or toys as referred to in the German "Lebensmittel- und Bedarfsgegenständegesetz § 5 Section 1 Nr. 1 and Nr. 5" provided the finished article is fabricated by good manufacturing practice and is generally suitable for the intended use.

A 3M Company

The glassfiber filler used for the production of the above-mentioned product supplied by Dyneon™ complies with the EU-Directives 90/128/EEC, 92/39/EEC, 93/9/EEC, 95/3/EC, 96/11/EC, 1999/91/EC about materials and articles made of plastics and intended to come into contact with foodstuffs or toys, as well.

The glassfiber filler of the above-mentioned product complies with the German Recommendation LII "Füllstoffe für Bedarfsgegenstände aus Kunststoffen" (194. Mitteilung: Bgesundh. Bl. 40, 109 (1997)) as issued by the German „Bundesinstitut für gesundheitlichen Verbraucherschutz und Veterinärmedizin" (BgVV).

Glass fiber is currently cleared for food use by FDA under 21 CFR 177.2410 (Phenolic resins in molded articles) and 21CFR 177.2420 (Cross-linked polyester resins). Use of glass fiber as a filler in PTFE is not currently cleared for use by FDA.

It is the responsibility of the customer to determine whether its specific formulation and intended use comply with applicable laws and is suitable for its intended applications.

Kind regards
